Listing of Claims:

Claims 1-28 (canceled).

1 29. (New) A support pillow comprising:

2 a cushion body having a medial region and two opposing arms that define a
3 generally open well, with the cushion body having an outer periphery and an inner periphery
4 adjacent the well, and wherein each of the arms terminates in an end; and

5 a fabric cover disposed over the cushion body such that the fabric cover conforms
6 generally to the shape of the cushion body, wherein the fabric cover includes at least one pocket
7 disposed along the outer periphery of the cushion body.

1 30. (New) A pillow as in claim 29, wherein the pocket extends substantially
2 along the entire medial region.

1 31. (New) A pillow as in claim 30, wherein the pocket further extends along
2 the opposing arms.

1 32. (New) A pillow as in claim 29, wherein the at least one pocket is divided
2 into a set of pockets.

1 33. (New) A pillow as in claim 29, wherein the pocket includes an open top
2 end into which items may be placed.

1 34. (New) A pillow as in claim 29, wherein the pocket is configured to be
2 expandable.

1 35. (New) A pillow as in claim 29, further comprising at least one attachment
2 secured to the cover.

1 36. (New) A pillow as in claim 29, further comprising an opening to permit
2 the cover to be placed over the shell, and wherein the cover includes at least one fastener to close
3 the opening once the cover has been placed over the shell.

1 37. (New) A support pillow as in claim 36, wherein the fastener is selected
2 from a group of fasteners consisting of zippers, ties, buttons, buckles, a hook and loop fastener
3 material, snaps, reversible pockets and hooks.

1 38. (New) A support pillow as in claim 29, wherein the cushion body is
2 constructed of a fill material that is compressed within a shell.

1 39. (New) A support pillow as in claim 29, wherein the shell is constructed of
2 a fabric, and wherein the cover is disposed over the shell.

1 40. (New) A support pillow as in claim 29, further comprising a pair of ties
2 coupled to the cover so as to be positioned at the ends of the arms, whereby the arms may be
3 pulled together by tying the ties.

1 41. (New) A covering for a support pillow comprising a cushion body having
2 a medial region and two opposing arms that define a generally open well, with the cushion body
3 having an outer periphery and an inner periphery adjacent the well, and wherein each of the arms
4 terminates in an end, the covering comprising
5 a fabric cover that is adapted to be removably disposed over the pillow such that
6 the fabric cover conforms generally to the shape of the cushion body , wherein the fabric cover
7 includes at least one pocket disposed along the outer periphery of the cushion body.

1 42. (New) A covering as in claim 41, wherein the pocket extends
2 substantially along the entire medial region.

1 43. (New) A covering as in claim 42, wherein the pocket further extends
2 along the opposing arms.

1 44. (New) A covering as in claim 43, wherein the at least one pocket is
2 divided into a set of pockets.

1 45. (New) A covering as in claim 43, wherein the pocket includes an open top
2 end into which items may be placed.

1 46. (New) A covering as in claim 43, wherein the pocket is configured to be
2 expandable.

1 47. (New) A covering as in claim 43, further comprising an opening to permit
2 the cover to be placed over the cushion body, and wherein the cover includes at least one fastener
3 to close the opening once the cover has been placed over the cushion body.

1 48. (New) A support pillow comprising:
2 a cushion body having a medial region and two opposing arms that define a
3 generally open well, with the cushion body having an outer periphery and an inner periphery
4 adjacent the well, and wherein each of the arms terminates in an end; and
5 a fabric cover disposed over the cushion body such that the fabric cover conforms
6 generally to the shape of the cushion body, wherein the fabric cover includes an elongate pocket
7 extending along the outer periphery of the cushion body at the medial region, wherein the pocket
8 is divided into multiple segments.
